*As a percentage of average daily NAV for the quarter valued at Php 27,832,875.38.

INVESTMENT OBJECTIVE AND STRATEGY

Intends to achieve for its participants long-term capital growth via investments primarily in Philippine equities listed in the Philippine Stock Exchange (up to 90% of the portfolio). The Fund aims to surpass its benchmark (gross of fees) which is the Philippine Stock Exchange Index (PSEi).

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The AB CAPITAL EQUITY FUND is suitable for individual and corporate investors who are at least classified as aggressive based on their risk profile and who seek potentially higher returns through stock market investments but are also aware of the possibility of capital losses that such investments may entail.

In order to minimize risks and maximize returns, the participants are recommended to stay invested in the Fund for more than three (3) years.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk	Possibility for an investor to experience losses due to the changes in interest rate. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
Market/Price Risk	This is the possibility for an investor to experience losses due to the changes in market prices of securities (e.g., bonds and equities). It is the exposure to the uncertain market value of a portfolio due to price fluctuations. It is the risk of the UITF to lose value due to a decline in securities prices, which may sometimes happen rapidly or unpredictably. The value of investments fluctuate over a given time period because of general market conditions, economic changes or other events that impact large portions of the market such as political events, natural calamities, etc. As a result, the Net Asset Value per Unit (NAVPU) may increase to make profit or decrease to incur loss.
Liquidity Risk	This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market. Liquidity risk occurs when certain securities in the UITF portfolio may be difficult or impossible to sell at a particular time which may prevent the redemption of investment in UITF until assets can be converted to cash.
Credit/Default Risk	Possibility for an investor to experience losses due to borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued. Inability of the borrower to make good on its financial obligations may have resulted from adverse changes in its financial condition thus, lowering credit quality of the security, and consequently lowering the price (market/price risk) which contributes to the difficulty in selling such security. It also includes risk on a counterparty (a party the UITF Fund Manager trades with) defaulting on a contract to deliver its obligation either in cash or securities. This is the risk of losing value in the UITF portfolio in the event the borrower defaults on his obligation or in the case of a counterparty, when it fails to deliver on the agreed trade. This decline in the value of the UITF happens because the default/failure would make the price of the security go down and may make the security difficult to sell. As these happen, the UITF's NAVPU will be affected by a decline in value.

*** THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORP. (PDIC).**
*** RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/ FLUCTUATIONS ONLY.**

STATISTICS

Volatility, Past 1 Year (%) ³	13.27
Sharpe Ratio ⁴	-0.5340
Information Ratio ⁵	0.7159

- ¹ Returns are net of fees
- ² Since Inception
- ³ Measures the degree to which the Fund fluctuates vis-a-vis its average return over a period of time
- ⁴ Used to characterize how well the return of a Fund compensates the investor for the level of risk taken. The higher the number, the better.
- ⁵ Measures reward-to-risk efficiency of the portfolio relative to the benchmark. The higher the number, the higher the reward per unit of risk.

WEALTH BANK PESO TD (WEALTH) - Php 2,112,206.43

Investments in the said outlets were approved by the Trust Committee. Likewise, all related party transactions are conducted on an arm's length and best execution basis and within established limits.

OUTLOOK AND STRATEGY

Stock Market

The Philippine Stock Exchange Index (PSEi) recovered slightly to 7,276.82 in the third quarter, posting a gain of 1.16% compared to the previous quarter level of 7,193.68. However, on a year to date basis, the PSEi was still down by 14.97%. Foreign selling accelerated, which brought year to date net outflows to P84.76 billion, 29% higher than the 1H2018 level of P65.80 billion. Foreign investor participation stood at 51% of total market volume. Concerns on elevated inflation, exacerbated by the effects of Typhoon Ompong coupled with rising oil prices globally, remain to be an overhang on the local stock market. Likewise, the Philippine Peso's weakness on the back of the country's twin deficit continue to spur caution from foreign investors. Rising interest rates, which increases funding costs for banks and also potentially affecting overall loan demand, have also begun to weigh on banking stocks. All eyes would be on the release of third quarter corporate earnings as investors try to assess the impact of higher inflation on company performance.

AB Capital Equity Fund Performance

The AB Capital Equity Fund posted a return of 6.62% in the third quarter of 2018. The Net Asset Value Per Unit (NAVPU) increased to 3.0663 in September 2018 from 2.8757 last June 2018.

Fund Strategy

The PSEi is seen to trade within the 7,000-7,400 range due to the headwinds of inflation, twin deficit, weakening currency and other external factors such as the ongoing trade war between the US and China. Key catalysts that would determine market direction include domestic inflation data, policy stance of the BSP, third quarter Philippine GDP growth and third quarter corporate earnings results. The Fund will continue to adopt a defensive stance, with enough cash and a portion placed in time deposit to protect the portfolio from downside risk. Any significant disappointment in macroeconomic and corporate earnings data could test the 7,000 levels or possibly lower. On stock selection, focus will remain to be on index names and select consumer-related companies.

LIST OF PROSPECTIVE INVESTMENTS

Pursuant to the foregoing objectives, the Fund may be invested and reinvested in:

- a) Listed and soon to be listed (Initial Public Offering), common stocks, preferred stocks, and securities convertible into or exchangeable to common stocks;
- b) Fixed-income securities issued by the government and corporations such as but not limited to, commercial papers, promissory notes, bonds, non-convertible preferred shares exchange-traded fixed income securities, collective investment plans of the trustee/other trustees and other marketable securities that are traded in an organized exchange market;
- c) Other investments allowed under regulations issued by the BSP.

The combined exposure of the Fund to any entity and its related parties shall not exceed fifteen percent (15%) of the market value of the Fund. Provided, that Fund investments, partially or substantially, in exchange traded equity securities shall be subject to the fifteen percent (15%) exposure limit.
